

Mr. ABHI DAS

Lead / Senior QA Automation Engineer | CI/CD Infrastructure & Platform Engineering

Australian Citizen | Sydney, NSW

[LinkedIn](#) | [GitHub](#) | [Credentials](#)

PROFESSIONAL PROFILE

Lead/Senior QA Automation Engineer and Platform Engineer with 18+ years of experience across sports streaming, retail analytics, construction safety SaaS, workplace compliance, and fintech. Specialist in architecting automation frameworks from scratch (Web, API, Mobile, Performance), building and managing CI/CD pipelines, and leading QA teams of up to 7 engineers. Proven track record of delivering measurable business impact: cutting developer onboarding time by 95%, saving USD 40K annually through infrastructure optimisation, and ensuring platform stability for million-user live events including the FIFA Women's World Cup 2023.

AI enthusiast with hands-on experience in agentic coding tools and actively upskilling in AI/LLM testing frameworks including DeepEval and RAGAS.

Key Industries: *Sports Streaming & Media | Retail Analytics | Construction Safety SaaS | Workplace Safety & Compliance | Fintech | AdTech*

TECHNICAL EXPERTISE

Programming	JavaScript / TypeScript, Node.js, Shell Scripting, Python
Frontend Testing	Playwright, Cypress, WebDriverIO, Selenium, Appium (Web & Mobile)
API Testing	Integration : REST, GraphQL, gRPC services using Postman/Newman, NodeJs; Contract Testing : Schemathesis, Pact
Non-functional Testing	Performance : K6, JMeter, Artillery ; Accessibility : axe-core, WCAG 2.1
AI & LLM Testing	DeepEval, RAGAS, LangChain, ChromaDB, Claude Code, Ollama, MCP Servers
CI/CD	GitHub Actions, Bitbucket Pipelines, CircleCI, Buildkite
Cloud & DevOps	Kubernetes (CKAD Certified), Docker, Terraform, Serverless, AWS & GCP Basics

CERTIFICATIONS

Certified Kubernetes Application Developer (CKAD) | ISTQB® Certified Tester | Certified Scrum Master® (CSM)

EMPLOYMENT HISTORY

Zitcha - Senior QA & Platform Engineer | Sydney, NSW | Jan 2025 - Mar 2026 (Perm)

- Quality Gates in CI/CD:** Architected and deployed an E2E test framework using Playwright with TypeScript directly into the build pipelines, enforcing strict quality gates that prevent code merges unless all tests pass.
- Developer Onboarding Automation:** Engineered a single-script solution to spin up the entire local development environment (backend, frontend, database) across 4 repositories. Reduced new developer setup time from 3-4 hours to under 10 minutes, eliminating the need for peer assistance and enabling instant environment resets.
- Contract Testing:** Implementing Schemathesis for automated API contract testing, ensuring API schema compliance across services and catching breaking changes before deployment.
- Compliance & Infrastructure:** Remediated critical platform compliance tests in Vanta through Terraform (Infrastructure as Code), ensuring adherence to regulatory standards. Built and maintained CI/CD pipelines as part of platform engineering responsibilities.
- Monitoring:** Established continuous, proactive monitoring by deploying applications as Datadog Synthetic Tests, significantly improving system health visibility.
- Culture & Mentorship:** Coached developers and non-technical manual testers on Playwright, fostering a unified quality-first approach across engineering teams.

Quantum | Lead QA Engineer | Redfern, NSW | Feb 2024 - Jan 2025 (Permanent)

- **QA Culture from Zero:** Established a robust QA culture and implemented full automated testing (Integration and E2E) across multiple engineering teams and delivery pipelines where none existed.
- **Framework Architecture:** Built automation frameworks from scratch using TypeScript with Cypress, Playwright, and customized solutions for Backend REST and gRPC services.
- **Peak Load Performance Testing:** Built performance testing frameworks using K6 to validate system tolerance during peak retail events (Black Friday, Christmas sales), reporting actionable insights to Engineering Leads and preventing production bottlenecks.
- **Pipeline Security:** Integrated SonarQube static analysis and configured pipelines to block releases if unit test coverage dropped below 60%, elevating overall code quality.
- **AI Expedition Winner:** Won the Quantum AI Expedition competition, demonstrating applied AI and innovation capabilities.

OptusSport | Lead Test Automation Engineer | Sydney, NSW | Sep 2022 - Feb 2024 (Contract)

- **Full-Stack Automation:** Developed, deployed, and maintained all automation frameworks from scratch: 70% Backend (Node.js, Axios, Mocha, AWS Lambda/S3/DynamoDB, Serverless, CloudWatch, Datadog) and 30% Frontend (Playwright with TypeScript).
- **FIFA Women's World Cup 2023:** Conducted performance testing using K6 to validate platform, API, and streaming infrastructure readiness for peak concurrent viewership during the tournament held in Australia, identifying and resolving bottlenecks pre-launch.
- **Test Data Generation:** Built dedicated APIs and scripts for on-demand test data generation, delivering significant time and effort savings for manual testers and developers alike.
- **Mentorship:** Mentored and coached junior QAs and functional testers on test automation best practices, tools, and frameworks, enabling them to contribute to automation efforts independently.

SafetyCulture | Lead QA Engineer | Surry Hills, NSW | Oct 2020 - Sep 2022 (Permanent)

- **Team Leadership:** Led and managed a team of 7 QA Engineers in a construction safety and workplace compliance SaaS environment, mentoring and upskilling them to operate autonomously on complex automation projects.
- **USD 40K Annual Cost Saving:** Containerised E2E tests within CI to enable parallel execution, eliminating the need for a paid Cypress subscription and saving approximately USD 40,000 per year.
- **Real-Time Test Observability:** Integrated CI/CD with Slack to deliver real-time test failure notifications to responsible feature teams, drastically reducing triage time and fostering a culture of accountability.
- **Testing in Production:** Established a robust T.I.P strategy: pre-deployment tests gated releases on failure, while hourly post-deployment cron jobs provided continuous system health monitoring with immediate high-priority failure alerts.

MYOB | Senior QA Engineer | Sydney, NSW | Jul 2019 - Jun 2020 (Contract)

- **TDD Adoption:** Championed and assisted development teams in adopting Test-Driven Development best practices across the organisation.
- **Broad Automation Coverage:** Created and maintained E2E tests using Selenium WebDriver/IO Typescript and API/GraphQL automation (Postman/Newman, Node.js) across web and mobile platforms.

Deltatre (acquired Massive) | Lead QA Engineer | Redfern, NSW | Jun 2017 - Jul 2019 (Perm)

- **Team Leadership:** Led a team of 4 QA Automation Engineers, developing full-stack automation frameworks in Selenium WebDriver/IO Typescript from scratch and mentoring junior engineers to contribute effectively.

EARLIER CAREER

Oracle India Pty Ltd - Senior Software Quality Assurance Engineer (Nov 2010 - May 2017)

ADP India Pty Ltd - Senior Member-Technical (May 2007 - Oct 2010)

EDUCATION

Bachelor of Technology in Electrical and Electronics Engineering (2003 - 2007) from Biju Patnaik University of Technology, India
